**ATTACK COUNTERATTACK - Julie Kipa**  
Neleman, the first foreign photographer to gain the confidence of the Maori and hence to be given permission to photograph them ...

So begins a dialogue that could have come straight out of any one of our colonial history books relating how Maori in their naivete trusted those who exploited them by imposing their racist belief of European superiority. It would come as some surprise therefore that the offending book, *Attack!* (ed. John Swinnen) was released as recent as

**news & events**

**24 JANUARY 2001**  
Tattoos are not a common sight on Christchurch's streets, much less traditional Maori tattoos (ta moko), but that could change after the city hosts a week-long hui on ta moko.

**glassdog**, so why start now?

17 September 2004

**Heart of the matter**

Cocaine, methamphetamine, Xanax, Valium, Wellbutrin, Celebrex, Vicodin and Diprivan were found in Rick James' body at the time of his death. But he died of a heart attack, according to doctors—not that the nine-plus drugs in his bloodstream weren't, you know, bad for him. He had a pacemaker implanted in 1998.

James died on August 4th and it took a little while to sort through everything going on inside the man, apparently, before the coroner could determine exactly what, out of all that, did him in.
